

# Change Motion (60-807-95R) Battery

## Read before changing batteries!

Before changing batteries, please call the monitoring station and ask them to put your system on test. For this, you will need your account information. Please note that putting your batteries in backwards may damage the device. Remember to note the battery terminals.

You will need a 2 x AA Battery

1. Find the tab at the top of the device.
2. Press the tab in and pull the cover away from the base.
3. To remove the cover, locate the three tabs, two at the top and one on the bottom, and press all three at once to pull off the cover. Be careful not to touch the little black square on the inside of the device as this will interfere with the motion detector's effectiveness.
4. Locate the batteries.
5. Gently remove the batteries.
6. Note the battery terminals (+, -). Putting in a battery reversed can damage the device.
7. Place new batteries in the device (2 x AA).
8. Replace the cover on the device. Press in until you hear a click.
9. Place the cover back on the base. Press in until you hear a click.
10. The light will turn on to signal that the device is operational.
